LEARNING OUTCOMES

Associate in Applied Science (AAS)
Program: Computer Information Systems: Programming & User Support

Upon completion of this program, students will be able to:

1. Identify and explain the purpose of various computer hardware components.

2. Create, edit, and format documents using current word processing software.

3. Create, edit, and format worksheets and graphs using current spreadsheet software.

4. Design, create, edit, format, and manipulate relational databases using current database software.

5. Create, edit, and format a slide show using current presentation graphics software.

6. Design and create web pages using current coding standards and current web publishing software tools.

7. Create, modify, and test programs using an object-oriented programming language to meet user specifications.
